*RE: MB Docket No. 14-57*

Dear Chairman Wheeler,

Thank you for the opportunity to comment on the proposed merger between Time Warner Cable and Comcast. At Maine & Company, we believe that the proposed merger should be allowed to go forward and that state will benefit from the merger.

Currently, a small part of Maine is on the Comcast network while the majority of Maine is on the Time Warner Cable network. Combining those networks will allow businesses and consumers to have access to all the benefits of the larger network. Such benefits as login authentication and consistent access provide a tremendous benefit and reduce personal and professional hassles. The combined company offers a streamlined solution.

It is also clear that the proposed combined company has significant investment plans for Maine. Comcast has been a leader in delivering broadband on a wide scale. The combined company will have the capability to deploy broadband at a dramatically faster pace than Time Warner could as a stand-alone company.

For these reasons and others, we support the proposed merger and are excited for the impact that proposed company could have on Maine.

Best Regards,
