RFD-TV and Public broadcasting are a breath of fresh air among all the really poor offerings provided by all the cable providers. I currently have Direct tv but I have also had Dish network and Comcast. Direct tv is better than the other two but it still has way too many channels of no value to anyone. It will be a travesty to allow cable providers to carry dozens of shopping and infomercial channels and not offer RFD-TV. I wont be watching T.V. anymore if RFD-TV is no longer available.
