The USA, when compared to other countries cable service, has the highest prices, the slowest speeds, and the most dissatisfaction of any country in the world. Where I live I have no choice as WOW is the only provider in the area. The Comcast merger with Time Warner would create a mega company with less choices for their now existing customers and undoubtedly higher prices. If these mergers are allowed, then even more customers will have few or no choices. PLEASE DO NOT LET THIS MERGER HAPPEN!
