Please protect rural programming! This type of programming is the backbone of America. This lifestyle, reflected in this type of programming, is what made America what it once was. The feeder of the world and the leader of the world.

Maybe we don't want to be the leader that we once were but perhaps we can be the leader in the fact that we don't forget our past.

Additionally, this programming provides information for people that want to raise their own chickens, grow their own food. Currently there seems to be a resurgence of interest in this lifestyle because people want to control their quality in their food. This programming aids in that.

Many Big-Cable said that they wish to be urban in their service but this viewpoint is bigoted in its point of view and is prejudiced against a point of view contrary to an urban lifestyle.
