To allow this merger of Comcast and Time Warner would be certainly sending a message of yet another way to show that the American people can be ignored over big corporation profits for a select few. Already, Comcast is known for their horrible service to their clients. For example, the last time I called Comcast to see if there was a discount period or special rate they could offer me due to some economic problems and then having to retire, I was told that nothing could be done for either my internet or home phone service costs unless I dropped to a lower level internet speed that would be less than half of my current speed, even though I have been a loyal customer for 12 years. Since I like my DirectTV satellite service, I will most likely cancel my Comcast internet and home phone accounts and try CenturyLink which is the only other option here. To allow Comcast to reduce their competition further by merging with Time Warner, this can only result in further insults to customers with higher prices and lousy service. Please say 'No' to this harmful merger!
