Comcast claims that their merger with Time Warner will make life better for more people. I'm not so sure. Our family greatly enjoys watching RFD TV. But with Comcast in our future that joy might be just a memory. I have learned that already New Mexico and Colorado have lost RFD TV. Just because Comcast professes to be primarily an "urban cluster cable company" that should not allow them to totally eliminate rural programming.

If this merger must go through, please protect Rural Independent Programming as a condition for this proposed merger.
