*RE: MB Docket No. 14-57*

Dear Chairman Wheeler:

**Timothy Wismar**  
Secretary

As the executive director of Quincy Asian Resources, I am writing to express my support for the proposed transaction between Comcast and Time Warner Cable.

**Board Members**

**Joel Buenaventura, Esq.**

Our organization works to foster and improve the social, cultural, economic and civic lives of Asian Americans and their families to benefit Quincy, MA and its neighboring communities. Comcast has shown support of our mission by providing grant funding for our youth leadership program and local support for our teen initiatives including a series of computer classes led by our youth leaders.

**Denise Chan**

Comcast has also made significant investments in Massachusetts and has demonstrated what a responsible corporate citizen looks like. It supports the widespread use and implementation of high-speed broadband in schools and libraries — efforts that promise to create learning environments that bring global resources to the classroom.

Moreover, Comcast's digital adoption program, Internet Essentials, is a low-cost solution that is helping to narrow the digital divide. Since 2011, the program has provided free training and service to low-income families, offering affordable broadband service that has benefited many Bay Staters. QARI has been a proud to partner with Comcast to deliver digital literacy classes to the Quincy community with the support of the Internet Essentials program. I understand that in 2013, more than 7,600 households in Massachusetts have received service via Internet Essentials. This exemplary program is a tangible example of the company's commitment to increase the accessibility of the Internet, and the merger with time Warner Cable will extend the program to new areas and provide benefits to many more families.

**Wan Wu, PhD.**

As an organization focused on providing opportunities for immigrant families, we understand the Internet is a powerful tool capable of connecting our families to the education and careers of the future. It also provides resources to maximize their health and well-being, benefits that underserved populations cannot afford to be excluded from. For these and other reasons, I support Comcast's proposed transaction with Time Warner Cable.

Sincerely,

John Brothers, Executive Director
