Today I write to the FCC to share the opinions and views of the Boys & Girls Club of Fresno County on the potential merger between Comcast and Time Warner Cable.

At the Boys & Girls Club of Fresno County our mission is to enable all young people to reach their full potential as productive, caring, and responsible citizens. We have witnessed how Comcast demonstrates responsible corporate citizenship, particularly through Comcast programs that support the communities they serve. Comcast invests heavily in their communities and have provided opportunities for underserved and impoverished youth here in Fresno County.

Our work together to prepare Club youth as participants to succeed in school and in life through tech skills training has been very fruitful. As with other Boys & Girls Club chapters nationwide, we are a Comcast "Internet Essentials" digital literacy training partner, incorporating free skill-building courses into our existing afterschool tech training programs for disadvantaged youth. We have also distributed information and sign-up materials to our participants to bring home. We know our efforts are part of the reason why more than 9,200 homes in the Fresno area have signed up for Internet Essentials.

It is inspiring to see an organization that cares and assists so generously. When you are considering this proposed merger, please think about all of the young men and women who could thrive with the help of Comcast in other markets in California and throughout the country.

Thank you for listening to our input.

Sincerely,

  
Diane Carbray  
Executive Director/CFO
