I wish to show my support for the continued viewing of RFD\_TV as a satellite channel. I watch this channel daily and I believe a great service to the urban as well as the rural community would be disadvantaged if this channel were not offered. I grew up on a farm and although not a farmer, have interests in this area for farming and ranching news as well as other entertainment. I also believe that most of the urban community either came from the rural areas, have relatives there and have friends there. There is more interest from that sector than most people know.

I support the efforts to maintain this channel in the future.
