In any merger, please assure subscribers that RFD-TV will remain part of Directv service. As a rural subscriber to Directv, one of our priority stations is RFD-TV. Although we have been Directv subscribers for many, many years, any consideration of dropping RFD-TV before or as a result of the proposed merger with AT&T, would cause us to drop Directv and seek other sources to view RFD-TV.

On a second note, we hope there will be assurances that such a merger as proposed will not cause price increases since competition in the marketplace will be diminished.
