I just went with Direct TV so that I could get RFD TV. Now I hear they are going to drop this channel. I think it's sad that corporate conglomerates control what we get to see. They get bigger, offer terrible and profanity laced programs and very poor service to go with it. I can't talk with anyone in the United States and the people that I do get to talk with do not know what to do or where to direct your call if it's not on their 3X5 card! When will you guys help the people? RFD TV offers a down to earth type of program and I certainly do not have to put up with profanity or other agendas that the corporate companies offer. Please do not let these mergers win again. We the people need a voice!
