My husband & I watch RFD each week. It would be a terrible loss to not have this great programming. I am tired of the big business in this country. This network has family entertainment and decent commercials. So much on the TV today is trash & now they could take this great programming away. We are tired of the networks featuring things for the young kids. We have worked all of our lives and deserve to watch something decent. We hope you will take this into consideration as it appears you do not disagree with big mergers. More and more my husband and I are looking for small businesses to deal with who are personable and easier to deal with.
