I've been with AT&T almost all my life including stockholder. Had been considering bundling Direct with AT&T until I heard recently the situation with RFD. I'll hold off until this shakes out. You all need to consider the importance of Rural & RFD programming to rural & urban households. Wholesome TV is not forgotten, just missing from most TV programming. I pay the higher tier on Dish to get RFD, also the best source for Blue Grass music. Thanks.
