RFD-TV is not just for the rural people in the country. It's good clean programming that follows the values of most Americans. I'm tired of filth being rammed down our televisions. We are bombarded with cursing, nudity, and sexual situations on every other station available. If RFD-TV is taken off the air I'll be switching providers or turning the whole thing off. I don't think the urban people would like it much if the farmers and ranchers decided to not sell their produce and livestock to the cities just because they work primarily in rural areas.
