Please protect rural television in this merger. Channels like RFD-TV provide important programming to rural folks, as well as insight into a vastly different way of life for urban Americans. This programming can be quite educational to people unfamiliar with farming, ranching and the rural lifestyles of the folks who provide our nation's food. As a current DirecTV customer, I very much want to be able to continue watching RFD-TV. Please do not allow this merger to shut down RFD-TV and similar programming channels. Thank you.
