We subscribe to Direct TV and are farmers in an area where either Direct TV or DISH are the only avenues that work for television broadcasting. There are not enough homes on our road for AT&T to bring in Cable. We enjoy RFD-TV which has interesting and healthy programming. We especially enjoy Mollie Bee and polka dancing, American Agri-Women programs, 4-H, agricultural news, etc. These are not available on any other station. Please consider this in making a decision on this merger. Will they be eliminating independent programming? There is not enough good programming now that is appropriate for families and children. Thank you.
