RFD TV is the most responsible TV channel on the air today. They support the American way of life and the work ethic that made this country the strongest and most ethical country in the world. This channel provides appropriate American family entertainment that is not found on any other network.

Many people rely on this channel for the things that matter in their lives, and is the only channel that promotes the True American way of life and is dedicated to serving the needs and interests of rural America, while doing their best to reconnect city folks with country people who make this country the best that it can be.

I find it unimaginable to see Al Jazeera ?the most un-American network ? on the air and RFD TV off the air in this country.

Please find a way to keep this Quality American network accessible for the good of the American people.
