I am concerned that the merger between AT&T and Directv may eliminate RFD TV from being carried on the new entity. I realize most of the country is urban now, but I feel the rural areas still need to be served also. RFD TV provides a valuable service in that regard. In fact, I believe many town and even city people enjoy their programs also. I hope this merger does not result in RFD TV or the other rural networks from being dropped by AT&T-Directv.
