

7521813615.txt

Please don't remove RFD TV. We as farmers receive a lot of very important information from this channel. There is also good clean entertainment on RFD TV. Our grandchild loves to watch Hee Haw and there aren't many TV channels anymore that we can sit down and watch together as a family.. If you remove the channel there will be a wall between rural America and corporate America.

There are segments for markets and marketing information and also the weather for the U.S. and information about the crops across the U.S. and the world. All of the information is valuable to the farmers of America.
