Dear sirs, the times that we are living in now indicate so much advancement in technology and communication that it's almost mind boggling. In my opinion rural living in this country is a part of this nation's heritage that brings a different type of family values which this country desperately needs. RFD-TV brings to my family in the midwest a deep, needed sense of wholesome values that were taught by our ancestors. If RFD-TV was removed from our viewing on DIRECTV I'd probably get rid of my television and scrap it all. Please keep RFD-TV on DIRECTV. Thank you.
