We have been with Directv for around 20 yrs. in that time no problems but I am thinking of closing my account with directv because of RFD tv. My husband is legally blind and 72 yrs of age that is his favorite program. He listens to this station more than he does the others. It has music, and many rural things that is important to our economy. If you are not used to the rural area this is one way to get educated on it with RFD tv. I think that both rural and urban is needed so people can see how the other one lives without having to be there. Lets hope everyone can work together to make things right. Thank you.
