I am against AT &T and Direct TV merger. I am for keeping our rural tv networks such as RFD-TV available to all areas of country at a reasonable price. These channels provide wholesome entertainment and information to our rural areas. Our rural Americans are very important to the rest of our country. Watching this on tv has been very rewarding for us. we have picked up many tips and ideas on farming and ranching. It is not good for America to have such a large corporation. Almost like a dictatorship This country does not need to be the American greed country, being only worried about the biggest profit made and not the working class people.
