Please do not allow the merger of At&T and DirectTV. We need more freedom of the airwaves rather than allowing another monopoly to take place. It is never good to have one company control access, availability, and content of information whether it is TV programming or the internet. We see this control in third world countries that chose information to promote an agenda. We are not far from that now but allowing one or two companies to have this much power makes us no better than the countries we criticize.
