I want to encourage the merger of DirectTV and AT&T to continue to include the Rural TV Channels. The Rural TV channels have many informative programs directed at those of us who live in rural areas that no other TV channels carry. I personally would miss the variety of horse programs and the daily market reports. They are not available on other channels so this information meant for a rural audience would be lost. If the merger is approved please see to it the Rural TV channels are included. Thanks you for your time
