We DO NOT believe that RFDtv should be removed from the lineups available because the shows are informative and entertaining. They have subjects that pertain to the rural communities. The shows impart valuable information about farming, equipment, and other important subjects. The entertainment shows are geared towards the taste of the people who live in these communities. Urban communities are not the only ones that should be considered. To ignore the rural communities in favor of the urban communities is discrimination. Leave RFDtv on and let people make their own choices. If someone doesn't want to watch a show, they can change the channel.
