

MB DOCKET ITEM 14-127

To the FCC :

This is to recommend you not force small local radio stations with limited personnel resources to file public comments electronically with the FCC. The burden of cost for this process exceeds any benefits that would be derived. We have limited time and resources and would appreciate any limitation on paperwork or duplication of efforts. Our small market AM radio station needs to spending time generating revenue, expanding listenership and providing community information. Less federal governmental paperwork is always appreciated.

Thanks for taking the time to read and react to these comments.

Best Regards

Jim Phillips
