I strongly support and encourage the Commission to expeditiously grant EPB to provide broadband service to communities bordering Hamilton county. Charter has been granted a monopoly in our area but they will not provide the service. THIS IS NOT "FREE MARKET"! If they won't provide the service then other providers that are willing to provide it should be allowed to do so.

Because the cost of the air card is so high I am not able to utilize all the services on the internet that I need. Why should we in the country be penalized because of an outdated law?

Please act favorably to allow EPB to provide us with broadband service.

Thank you for hearing my request.
