

As an elder adult in a community not privileged to have access to high speed internet, I realize the opportunities missed by citizens not given this equal opportunity. As a parish nurse who visits in many socioeconomic homes, it is a glaring omission that our community is not privileged to experience.

Students are not given equal opportunity to prepare their lessons assigned by their teachers. Senior adults confined to their home are not given the opportunity to communicate and receive information that people having high-speed internet can utilize. I would like to express my concern that our area in south Bradley County does not have these equal opportunities due to a law prohibiting expansion of services to this area. I would appreciate you looking into this matter and responding to these deiciencies.

Doris Price, RN, BSN
Parish Nurse
