

I am writing in support of RFD TV. If you stop into any house out in the country you will find it on all day. It is the only place to get news and information targeted to the people who still live in the country. And the entertainment content is not available anywhere else on the air. It would be a shame to lose such a unique asset – one that is so important to so many people. Please do whatever is needed to ensure that RFD TV stays on the air.
