government control is out of control. it has become so corrupt that the corruption has leaked down from a national scale right out to out front doors. the internet has saved my family members from depression including myself. we can watch videos and read comments and stuff like that and know that we are not alone. we are one and together we can conquer anything! by taking away internet speed you can easily take away the "it gets better and you are hear for a reason" someone needs to hear before they kick the chair or stool from under their feet. im saying this from the point of view of someone who has been saved countless times by the internet, dont take away the one thing people rely on to feel connected.
