

I am opposed to the proposed rules that allow corporations to take control of the Internet. I support equal and open Internet access! We want complete eradication of the recently proposed rules that will discriminate against certain websites. Please regulate broadband Internet providers as common carriers so that the Internet will not be divided into a fast lane for corporations and a slow lane for everyone else. Verizon and Comcast (and others) are oppressive giants that are very consciously going against what ALL of the people want! All they care about is their own wealth, and it's at the expense of society. It is CRIMINAL and discriminatory! FCC, hear the people's cry; they shout for internet equality for all!
