

Chairman Wheeler,

Is current communications methods functionally equivalent today for Deaf & Hard of Hearing Consumers?

NO! It is a DISCRIMINATION AGAINST DEAF & HARD OF HEARING CONSUMERS

It is TIME for FCC to take action on Video Interoperability. You have the power to MAKE IT HAPPEN!

It will be the best decision that FCC ever made because It will also resolve the current VRS drama of interoperability.

It will ALSO save millions of dollars if FCC orders interoperability NOW instead of wasting money on a very outdated method, developing Neutral platform, Reference Platform & etc.

ALL FCC have to do is make a simple declaration to ensure ALL video communication methods to be interoperability!

Is current communications methods functionally equivalent today?

Voice Phones:	Video Communications:
+ MANY OTHER COMPANIES	+ MANY OTHER COMPANIES
100% Interoperable	0% Interoperable

DISCRIMINATION AGAINST DEAF & HARD OF HEARING CONSUMERS

#VideoInteroperabilityNOW!

As you can see on the picture on how many Voice Communications are interoperable fully (with many thanks to older FCC's administration to ensure it happens years ago!) While Video Communication methods are NOT!

It is time for you to ACT and DO the right thing for the future of Deaf & Hard of Hearing Consumers!

Thank you

**Jon Ziev
Deaf Consumer**
