I watch both WNCT and WRAL on Suddenlink Cable and see a need for both stations to remain on local cable. WRAL provides more in depth news regarding events occurring in our state capital that impact all of NC. It provides more regional and national news than the local station. WNCT focus on local news with limited regional and national news. WNCT does not always carry breaking news on a national level when it occurs; WRAL does. The present arrangement has worked well for many years and provides a balance for local cable users. I recommend you leave the current system as is and allow the viewers too view what they want to view. Thank you for allowing me to make these comments.
