In no way shape or form is this law helping anyone except the big corporations. The internet should be a place where anyone can go and not have to pay a premium to get their deserved speed of connection. Net neutrality is a great thing and anyone trying to change that is attacking all citizens and their rights to freedoms we deserve and fight for. And for the love of god please stop falling in to the pockets of all these corporations that lobby you government! It's getting pretty ridiculous.
