Look im this is what im gonna say. if you make the internet more difficult for normal people to use. we will make our own server connections like citizens did in Egypt. result the full wrath of the internet and american citizens will descend upon all gov and corp entity's that are involved. yes idiots may elect you to another term but that will be short lived as you will be doxed (every call bank transaction thought and deed you have done delivered to the public) lose your family home and wealth so.. Fuck off of our internet!!!!!!!!!!
