Concerned Commission Staff-

- 1) There is no upside to this proposal for the US consumer. There is only further differentiation between the "haves" and "have nots". I'm a "have". I can afford the "hyperspeed" service. But it is flat out wrong to create an information-gap in addition to an economic gap.
- 2) Please maintain net neutrality. Reject the cable company proposal for a two-tier system. Or ANY kind of pay-for-access approach which favors the larger companies.

Respectfully,  
Sue B Carter
