The Internet and how quick it is is infinitely important to me. I use it for schoolwork, I use it to keep in touch with friends and family, and for various other uses. My favorite sites will be unfairly slow just because they can't pay for it. Certain things that we enjoy will be censored, and any video we use will be of horrible quality. YouTube will be a disaster, and I can't name a single person I know personally that doesn't use YouTube weekly. We will have fewer sites that work well and the Internet will be extremely less diverse in content. This isn't even MENTIONING the how easy it will be to discriminate online if this is passed. We NEED Net Neutrality.
