

7522188976.txt

Dear FCC,

Please refrain from placing any and or all restrictions on our Internet services. By doing so, you will have violated our First Amendment rights in the US, as the Internet is a source of public social communication world wide and home to millions who use it to express our freedom of speech. To do so will have serious consequences and would lead down a slippery slope to an unforgivable future. Thank you for your consideration.
