To Chairman Wheeler,

Please keep the internet open. I am a Californian working as a Product Manager for a software company in the Bay Area. I am also a student in the process of obtaining my MBA. I am very proud to be an American citizen, and also a traveler of the world. I support education, entertainment, communication and creation through the internet. I do not support Internet Service Providers placing fees for "fast lanes". We need to allow anyone who would like to provide a service online to be able to do so without having to consider a nominal fee. The internet has been and should continue to be an amazing non-discriminatory tool for the globe.

Thank you,
Charlene Peluso
