Dear FCC,

My name is Tdawg and I live in dallas, TX.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it users may have fewer options and a less diverse Internet.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

The Internet is important to me because, as an online gamer and a active internet user, I need to know that there will not be barriers to speed for the online games i play or the websites i visit. i can't have this bullshit law ruin my fun online. Do not kill net neutrality, doing so will have massive consequences. the people won't stop fighting. neither will i. im with team internet!!!!

Sincerely,

Tdawg
