Dear FCC,

My name is Alicia King and I live in Pleasant valley, NY.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it Because I run a small business and the internet is my main source of advertising. Without it my business may fail.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

I'm not a big business so net neutrality is super important to me. I make my living off of people seeing my work on the internet and if you take that away there's no way my Business will stay afloat and my dream will die.

Sincerely,

Alicia King
