We want the internet as free as human beings

The "net" is the last bastion of responsible and informative "self-directed journalism"

Keep the internet FREE and OPEN

The great has got to stop!  
We need neutrality to prevent the tyranny of the majority  
Etc to fuckin lame men

Other countries have faster internet service AND cheaper prices. Don't let these companies force us to pay even higher prices for mediocre connection speeds.

I want open internet!

I can't believe we're doing this again. This government is getting dystopian.

Keep the net neutral! EQUAL access for ALL (regardless of \$\$\$) is needed. Thanks for listening

Access to open internet is a civil right. FCC, protect our rights!  
Give us freedom! The United States has always been a beacon of liberty for the American!

Access to open internet is a civil right. FCC, protect our rights!

Open and free internet!

Let freedom ring! Leave the internet free and open.

Product net neutrality

The internet is a powerful means of communication and we must protect its neutrality!  
Net neutrality is a civil right and right for our democracy. Do not roll it out.  
Freedom is the right of net neutrality. A freedom of speech and need this as technology. FCC. Do the right thing.

The Classification guarantees the right of assembly. As new technologies arise, they will be used to facilitate - citizens must have a free and open avenue for civic discussion. Keep the internet a vehicle for democracy, not incense.

KEEP NET INDISTURBED!

I want net neutrality!  
Net neutrality is a matter of civil rights. The internet must be designated as a public utility! Please oppose internet censorship, and guarantee our basic freedoms to have equal access to information on the internet.  
Keep the internet neutral!

Net neutrality is a right that no one should be allowed to take away. The internet should be open to all even if they are not so well off. Taking away net neutrality is arguably abusive and unacceptable.

KEEP NET INDISTURBED!

Or internet Neutrality? Or internet Neutrality? I want this over your paid content!

For an open democracy with the ability to communicate freely, we need an open and free internet. We need Net Neutrality.

Net Neutrality for all!

WE DEMAND AN OPEN INTERNET!!!

Net neutrality is important for communication and should be available a free for all even for three major business companies such as Comcast, Verizon, and AT&T. Stop this monopoly please.  
Free Net

Please protect Net Neutrality!!!

Preserving Net Neutrality is of the utmost importance especially as our society becomes more and more integrated with the internet. It is already essential to modern life to have access to the internet and all of it's resources. This is a matter of civil rights as the internet is has become a need instead of simply a luxury.

The internet should be free from corporate control. Without net neutrality we are opening the door to oligopolies in the telecommunications sector.

Please understand the consequences of your intended actions. Thank you.

Initially became aware of institutional racism entry many protests due to the internet, and the success and perspective available on it. Silencing the people who promote corporations and capitalism will breed ignorance and do-do-do-do.

KEEP NET NEUTRALITY

Please do not favor a system that punishes and encourages discriminatory internet access that punishes all at the whims of big corporations. Protect our civil rights. Keep Net Neutrality.

KEEP NET NEUTRALITY

I am in favor of an open internet because it has allowed me to find a community of people like me. People who suffering from the same illness as I. People who are interested in pursuing a higher education. People who are interested in the same field of literature. An open internet has allowed me to connect with people I would never otherwise. It has opened so many doors for me. Please do not increase the burden on young people of color like me by forcing you to pay to access resources

Please reclassify internet as a telecommunications service. Protect our civil rights in today's digital world!

If you do this you are not just taking away sites for internet cravers, you're making people pay more money to go to school and try to find jobs and keep in touch with family. The internet should be open and free. There are more important things that need to be fixed in America besides old laws that AREN'T broken.

Net neutrality is a human rights issue, and no one should have to live like their right to speak online is being censored.

Make the internet equally accessible for all.

Keeping the internet an unregulated commonsense. Keep the net neutral and open for all.

It's like money is CDO in the USA. Keep this one place free!
