Dear FCC,

My name is Michael Cianfaro and I live in Binghamton, NY.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because ISPs could act as the gatekeepers to their subscribers.

The Internet is one of the greatest inventions ever created. By allowing a few companies to control it would be giving far too much power in the hands of a few individuals.

Sincerely,

Michael Cianfaro
