Dear FCC,

My name is harun williams and I live in El Paso, TX.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it ISPs could have too much power to determine my Internet experience by providing better access to some services but not others.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

You people are a bunch of greedy capitalist fucktards. don't you have enough money fucking over Americans and the rest of the world? I hope you choke on your vomit and die while you are sleeping!

Sincerely,

harun williams
