Dear FCC,

My name is Maria D'Atri Cortez and I live in Lompoc, CA.

Net neutrality, the principle that Internet service providers (ISPs) treat all data that travels over their networks equally, is important to me because without it as with everything else in our society, those with the most money will be favored over those with the least.

A pay-to-play Internet worries me because new, innovative services that can't afford expensive fees for better service will be less likely to succeed.

The free access of information is extremely important to all of us. Those with the most money should not be able to control the flow of the internet. With the economic gap widening, it is crucial that EVERYONE have equal access to the internet.

Sincerely,

Maria D'Atri Cortez
