The Salt Lake Chamber is Utah's designated statewide chamber of commerce representing 8,000 businesses, which employ nearly half of the workforce in Utah. The Chamber's mission is to support our members' success by advocating for simplified and reasonable regulations as well as predictable and certain laws, so rational people can be confident in deploying resources into a production economy.

The Chamber has established a long-standing principle of free enterprise. We support America's free enterprise system as the best way to grow the economy, stimulate innovation and create jobs over the long term.

We support Utah's coordinated effort to expand broadband access, enhance reliability and increase speed so that our state can remain a leader in economic development. The Chamber supports the merger of AT&T and DirecTV as a way of further expanding rural broadband infrastructure.
