I don't agree with you the FCC wanting to reclassify ISPs as common carriers. This move of yours will kill Net Neutrality and force Millions of people to pay more for the internet as well as censor it.

Wheeler??s plan would let Internet service providers like AT&T, Comcast and Verizon create a two-tiered Internet, with fast lanes for the few who can afford the extra fees and a slow dirt road for the rest of us. These companies would have the power to pick winners and losers online and discriminate against online content and applications. And no one would be able to do anything about it.

I am totally against this and FCC should be independent protecting the Net not in bead with Internet service providers like AT&T, Comcast and Verizon who only wants to make even more money and providing less Net Neutrality.
