Dear FCC,

This internet been in my life since growing up. It is to be fun, free, and enjoyable for all of us. Please do not take away my childhood. We shouldn't be taking away human rights to enjoy internet we paid for. If you make this change, this will destroy the history that the person created the internet to use it for freedom. No one should have the right to choose what we want the internet for. Have them choose if we can have fast net and others who can't afford it have to use the slow internet. We should have the choice and for you to take it away would be criminal. You should know that these companies shouldn't choose. It should be free and they should pay like the rest of us. It not their choice, it is ours. Keep the internet as it should be. We should not lose it because that would probably end the net as we all know it as. This is the land of freedom. Keep the internet as it is and stop those companies from keeping us from our net being slowed down because we can't pay for it. It is not right, it is wrong, and stop them before they change it FOREVER!
