My family asks that you thoughtfully consider the importance of rural programming stations for the many thousands of people who depend on this type of programming not just for entertainment purposes but also for their livelihood. Our family is in the cattle production business and we rely on televised auctions, such as those from Superior Livestock Auction, for the ability to market and purchase cattle from many locations across the U.S.

Although our population numbers in the rural areas of the Heartland do not match those found in the urban areas of this country, our contribution to our country and the world should not be taken for granted.
