Please do not allow or facilitate the removal of net neutrality. Net neutrality is necessary for an open marketplace on the internet where new companies with better ideas or methods can prosper. There is ample evidence that the "fast" and "slow" lanes its removal would create would not be "additionally fast" and "normal speeds" but "normal speed" and "reduced speed for everyone else." It is ludicrous that despite many of the largest and most established internet companies and advocates' wishes, you would consider doing this. It's a simple thing.... Don't be corrupt.
